MICHELIN TRIAL LIGHT

TRIALS

- ▶ More than a pound lighter than its predecessor, for improved suspension response and maneuverability
- ▶ Rigid sidewalls reduce tire movement on the rim, even at very low pressure
- ▶ Recommended pressures for trials use: 6 psi front, 5 psi rear
- ▶ Maximized Contact Patch casing enhances grip on loose dirt and in corners

Size	Load index & Speed rating	Michelin Tube	Overall width		Overall diameter		Max load ¹		Tread depth ²		Preferred rim width (compatible rims) in

¹Refer to the motorcycle owner's manual for the vehicle's load capacity. Michelin recommends the tire pressures quoted by the vehicle manufacturer.

²Tread depth measurements rounded to nearest whole number.
